

FliteCharts Data Alert 23094

TO: Users of all Garmin aviation products and Garmin Pilot™ using the United States, North America, Europe, Central Europe, Western Europe, or Brazil FliteCharts® database

DATE: August 30, 2023

CYCLE: 2308

SUBJECT: Incorrect geo-referencing for some approach procedures in the United States, Europe, and Brazil

PRODUCT AFFECTED

The United States, North America, Europe, Central Europe, Western Europe, and Brazil FliteCharts databases for cycle 2308 are affected.

DESCRIPTION

The geo-referencing is incorrect for some approach charts in the United States, North America, Europe, Central Europe, Western Europe, and Brazil FliteCharts for cycle 2308. Affected charts are listed at the end of this alert.

PILOT ACTION

Do not refer to geo-referenced aircraft position on the affected approach charts in FliteCharts.

NOTE

Do not maneuver the aircraft based solely upon the geo-referenced aircraft symbol. As indicated in the pilot's guide, geo-referencing is provided for situational awareness only.

Alerts are written for the currently effective cycle and next cycle. It is possible that data from prior cycles is also affected. Garmin recommends using the latest effective data cycle.

RESOLUTION

Geo-referencing for affected charts will be corrected in the 2309 cycle of the United States, North America, Europe, Central Europe, Western Europe, and Brazil FliteCharts databases. Cycle 2309 FliteCharts databases are effective September 7, 2023 and will be available September 5, 2023.

Garmin requests the flight crew report any observed discrepancies related to database information. These discrepancies could come in the form of an incorrect procedure, incorrectly identified terrain, obstacles, fixes, or any other displayed item used for navigation or communication in the air or on the ground. Go to [FlyGarmin.com](https://www.flygarmin.com) and select "Aviation Data Error Report."
